

1. How do we process our readers' database?

2. Readers' Compliments

A Automotive Industry Readers Dec 06/Jan 07 issue

Co.: Wuhu Xi Ji Rui Automobile Limited Company

Name: Shang Zong Wen, Engineer

■ "The Advanced Manufacture Technology" - This article has been most helpful. It reflects the development and the direction of core processing equipment in the manufacturing industry.

■ As a whole, I agree very much of the content of CMJ, especially the special supplement and the focus columns. The content is substantial.

Co.: The Shandong Province Qingdao Engine Factory

Name: Wu Guang Ling, Assistant Plant Manager

■ As a whole, CMJ is a top-grade professional publication.

B Die and Mould Industry Readers Dec 06/Jan 07 issue

Co.: The Shandong Zhong Tian Mold Limited Company

Name: Shang Zong Wen, Chairman of the Board

■ CMJ is great as it helps me to widen my vision and understand the latest market trends and advanced technology.

Mar 07 issue

Co.: Jinan Gao Qiang Standard Parts Limited Company

Name: Ye Yang

■ The article, "The Development of Die-casting Dies in China" most impressed me. It helps an enterprise to understand the direction of advanced development.

Co.: Shanghai Cheng Tang Metal Product Limited Company

Name: Yan Wen Ting, Service Commissioner

■ The product corner column impressed me very much.

May 07 issue

Co.: The Qingdao Mold factory of Bicycle Company

Name: Li Shi Sheng, Plant Manager

■ I am very satisfied with all the articles in CMJ as they are very professional. Especially the article, "Front line - Current Status and Development Trend of Guangdong Mold Industry", which enabled readers to understand the Guangdong mold industry.

C Aerospace Industry Readers May 07 issue

Co.: The Guiyang Wan Jiang Aviation Mechanical and Electrical Limited Company

Name: Tu Xing Zhen, Assistant Director

■ "Front line - Current Status and Development Trends of Guangdong Mold Industry" inspired and helped me a lot. It is undoubtedly useful for Guangdong and even China. Moreover, another article, "An inquiry into Technical Management of Die & Mould Manufacturing Enterprises" was very practical.
